

# Achieving energy efficiency in housing

## The revised Building Regulations – Part L1

**Energy Efficiency Best Practice in Housing** presents seminars across England & Wales, June-September 2003

- Find out how the new Building Regulations affect you
- Learn how you can use them to improve energy efficiency
- Develop your understanding to meet and exceed the new requirements

### What's the background?

The 2002 revisions to Part L of the Building Regulations have had major implications on the design, construction and refurbishment of homes and the Government has recently signalled an acceleration of the next major review. These seminars help to explain the regulations and to equip delegates to design and build to higher standards of energy efficiency.

### Why attend?

The detailed requirements of Part L1 are still having a major impact on the way many professionals within the housing and construction sectors approach energy efficiency.

In addition to tackling the requirements of Part L1 these events provide an understanding of Best Practice to help professionals go beyond the regulations now and so prepare for the challenges of future changes. Afternoon 'workshops' will give you practical advice and examples of how you can apply the new regulations to improve energy performance.

You will also have the opportunity to question experts, discuss issues of mutual interest with fellow professionals and receive a complementary information pack containing a range of relevant literature.

### Who should attend?

Professionals involved in all aspects of housing and housing design, particularly architects, builders and installers, housing associations, local authorities and others who have an influential role in the energy efficient performance of dwellings.

### Programme

The seminar will run from 10.00am – 4.00pm (registration from 09.30am) and includes complimentary lunch - *see booking form for venues and dates.*

Morning	Afternoon
<ul style="list-style-type: none"><li>- Introduction and welcome</li><li>- Introduction to the new regulations</li><li>- How to meet or exceed the requirements of the new regulations</li><li>- The impact on existing dwellings</li></ul>	<ul style="list-style-type: none"><li>- Interactive workshops covering:<ul style="list-style-type: none"><li>- SAP 2001/Carbon Index (including methods of calculation)</li><li>- Robust details</li></ul></li><li>- Summary plus questions and answers</li></ul>

### Securing Your Place
